Geometric approximation of curves and singularities of secant maps

Ghosh, Sunayana

IMPORTANT NOTE: You are advised to consult the publisher's version (publisher's PDF) if you wish to cite from it. Please check the document version below.

Document Version

Publisher's PDF, also known as Version of record

Publication date:

2010

[Link to publication in University of Groningen/UMCG research database](#)

Citation for published version (APA):

Ghosh, S. (2010). *Geometric approximation of curves and singularities of secant maps: a differential geometric approach*. s.n.

Copyright

Other than for strictly personal use, it is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), unless the work is under an open content license (like Creative Commons).

The publication may also be distributed here under the terms of Article 25fa of the Dutch Copyright Act, indicated by the "Taverne" license. More information can be found on the University of Groningen website: <https://www.rug.nl/library/open-access/self-archiving-pure/taverne-amendment>.

Take-down policy

If you believe that this document breaches copyright please contact us providing details, and we will remove access to the work immediately and investigate your claim.

Downloaded from the University of Groningen/UMCG research database (Pure): <http://www.rug.nl/research/portal>. For technical reasons the number of authors shown on this cover page is limited to 10 maximum.

List of Tables

1.1	Seven catastrophes by Thom	25
3.1	Complexity results for spiral arc, the Hausdorff metric case . .	76
3.2	Complexity for spiral arc in the symmetric difference distance case.	79
3.3	Complexity results for Cayley's sextic, the Hausdorff metric case.	81
3.4	Complexity results for Cayley's sextic with respect to the sym- metric difference distance.	83
4.1	Complexity table for a conical spiral curve	119
4.2	Complexity table for the moment curve	119
4.3	Complexity table for a spherical helix curve	120
6.1	Generic secant germs of immersions	142
6.2	$\mathcal{A}(H)$ -stable germs $\mathbb{R}^4 \rightarrow \mathbb{R}^n$	148
